

How our membership benefits WISE

WISE, which has 30 years' experience of inspiring girls to pursue STEM subjects, now incorporates the UKRC, which had a contract from the Government from 2004-12 to increase opportunities for women in science, engineering and technology through support services to business, education and women returners.

WISE is now an independent Community Interest Company. WISE state that it is only with our support that they can together achieve their vision of 30% of the UK STEM workforce being female by the year 2020. The WISE mission is to promote female talent in STEM, from classroom to boardroom and they deliver their mission by building, sustaining and developing the pipeline of female talent in STEM.

WISE affirms that progress towards the 30% critical mass is too slow – they need our support to grow the campaign and make a bigger impact.
