

In a Nutshell: Copyright and Scholarly Publications

Who owns the copyright?	Can you put a copy in Opus?
<p>To begin with, the author(s) or their employer usually owns the copyright.</p> <p>As a general rule, the University of Bath does not assert its right to own the copyright in scholarly works produced by its staff and students (see the Ordinances of the University, section 22.3(e) http://www.bath.ac.uk/ordinances/).</p>	<p>If you hold the copyright to a publication, then you can put a copy in Opus without seeking further permission.</p> <p>If you share copyright with co-authors, you will need their permission. Visit the Opus website for a template request permission letter.</p> <p>Placing your work in Opus does not prevent you from publishing your work in other places. However, please be aware that some publishers will not publish material that has already been publicly available.</p>
<p>In the publishing process, ownership of copyright may be transferred to the publisher. Alternatively, the author(s) may keep the copyright and instead grant the publisher a licence to publish.</p> <p>For works with more than one author: one author may assign copyright to the publisher on behalf of all authors, provided they have permission from all other authors.</p>	<p>Check your agreement/licence with the publisher: this usually sets out the terms under which you can make further use of your work, e.g. for teaching, sharing with colleagues, and distributing via a repository like Opus.</p> <p>Many academic publishers allow you to place a version of your work in Opus, but not necessarily the final published version. (See the Opus website for more on versions.) The <i>Sherpa Romeo</i> website http://www.sherpa.ac.uk/romeo/ has details of many publishers' policies.</p> <p>If your agreement with the publisher doesn't give you permission to put a copy in Opus, you can contact the publisher to request it. Visit the Opus website for a template permission request letter.</p>
<p>Within a publication, there may be sections (eg. images and quotations) that are the copyright of a third party. Permission is usually required use third party copyright content in a publication.</p>	<p>Check your agreement with the copyright holder. Even if you have already been given permission to include the material in a publication, you may need to request further permission to make the material available in Opus.</p>

Copyright Options

Open Access Publishing

Some publishers require or offer authors an option to make their work open access (i.e. freely available online) at point of publication. Usually the author has to pay a publication fee to make the work available to readers. This isn't the same as vanity publishing: open access scholarly publications should still be subject to rigorous peer-review. You may be able to use your research grant to pay such publication fees. If a publication is already open access, we can link to it from Opus rather than adding a copy to Opus.

Creative Commons

With a Creative Commons licence, you keep ownership of the copyright but allow people to copy and distribute your work provided they give you credit.

Using a series of simple questions, the Creative Commons website allows authors to specify conditions they wish to use to make their work available and then produces both a human-readable brief summary, and a comprehensive legal code.

The Creative Commons Licence is available from: <http://creativecommons.org/>

Many open access scholarly journals publish under creative commons licences.

Licence to Publish & Author Addendums

You should carefully review any documents which you are asked to sign by a publisher. They may limit your ability to deposit your work in Opus or restrict any future use of your work.

Rather than signing over all copyright, including your right to distribute your work, to a publisher you can retain your copyright and grant the publisher a non-exclusive licence to publish. This allows the publisher to do what they need, for example distribute copies of your work, but also allows you more freedom to re-use the material.

Alternatively, consider adding an author addendum to the copyright transfer agreements offered by your publisher. The *SPARC Author Addendum* is a legal instrument that modifies the publisher's agreement and allows you to keep key rights to your articles. The *SPARC Addendum* is available from:

<http://www.arl.org/sparc/author/addendum.html>

Opus staff are happy to help with questions about copyright.
