Michael Carley is a graduate in Mechanical Engineering of the University of Dublin, followed by a PhD in aircraft noise from the same institution. Since then, he has worked as a postdoctoral researcher and lecturer at Trinity College, Dublin, and at the University of Rome III, coming to Bath in 2000.

His research interests are acoustics, in particular aerodynamically-generated noise, and numerical methods. An active trade unionist, he has served as a representative in the Irish Federation of University Teachers, the Association of University Teachers, and has held a number of roles in the University and College Union.
