Course Description	
Course Summary	Explore contemporary global challenges through the lens of politics and economics. These include climate change, inequality and international conflict.
Course Description	<p>By combining the study of politics and economics, you'll develop a deep understanding of how and why some of the biggest global decisions are made.</p> <p>You'll gain fundamental knowledge of economic and political theory, and apply this to key challenges facing national and international society. This will allow you to critically analyse major issues, such as terrorism and climate change, and how we can respond to them.</p> <p>In Year 1, you'll focus on the core concepts of politics, international relations and economics. You'll study micro and macroeconomic theory and methodology, and explore contemporary political and economic systems.</p> <p>In Year 2, you'll improve your knowledge of comparative politics, international security, and the economics of money and finance, while developing your skills in research design and methods. Through a broad range of optional units, you'll be able to start specialising your knowledge.</p> <p>In your final year, you'll write a dissertation and study the history of economic thought. You'll also choose from a range of optional units, giving you the freedom to explore topics that interest you and prepare you for your potential future career. Optional units may cover areas like radical politics, US security policy or international political economy.</p> <p>Informed teaching to advance your learning</p> <p>You'll learn from teaching staff with diverse backgrounds and expertise in different areas of politics and economics. Their passion, knowledge and research shape their teaching to enhance your learning experience.</p> <p>Develop your professional skills</p>

We work to provide you with the tools and support to prepare you for employment and further study. These include:

- critical and analytical thinking
- presentation and communication skills
- adaptability and resilience

Contact hours

Contact hours

Timetabled contact hours, which may be made up of lectures, seminars, tutorials and workshops, vary throughout your course and between courses but are typically between 10 and 15 hours a week in your first year.

Our teaching for this course is delivered through in-person learning on campus, supported by high quality online provision. A small proportion of these contact hours may be delivered online, with the significant majority taught on campus. This may be supplemented by additional activities such as a small number of online learning sessions (not live), skills development sessions, and personal tutorials.

The amount of timetabled sessions on campus in later years may vary based on the options you choose, with a greater emphasis on independent learning. Project and dissertation units will generally have fewer scheduled sessions to allow you time for your independent work - this may also mean the number of hours of timetabled sessions each week will vary within a year.

Independent learning

In addition to timetabled contact hours, you are expected to undertake independent learning and assessment activities. Typically, this might be around 20 to 30 hours per week in your first year, and include individual and group projects, preparing coursework assignments, presentations, or revising for exams. After your first year, the emphasis on independent learning becomes greater, for example, you may do a final year project in the final year.

Assessment summary

You will be assessed in a range of methods designed to develop and test your skills and knowledge.

55 - 75% of your course will be assessed through coursework. The balance of the assessment by examinations and assessment by coursework may depend on the optional units you choose.

The final degree classification is determined by your second and final year marks and each contributes 32% and 68% respectively.

You will primarily be assessed individually, but may also be assessed as part of a group.

We can make reasonable adjustments to assessment procedures for students with disabilities, take a look at our Disability Service's pages for information.
