Course title	BSc(Hons) Psychology with work placement
Route(s)	BSc(Hons) Psychology with work placement
Awarding body	University of Bath
Award	Undergraduate Degree with Honours
Award name	Bachelor with Honours
Course mode of delivery	Thick sandwich (Full-time on campus)
Course length	4 years
Entry point	September 2024
Main location of study	University of Bath, Main Campus, Claverton Down
Course-owning school/department	Psychology

Course Description

Course Summary	Study across the discipline of psychology with a focus on biological, cognitive, developmental and social aspects, with options including clinical and health.
Course Description	<p>On this degree, which is recognised by the British Psychological Society (BPS), you'll learn about and gain insights into many aspects of psychology.</p> <p>You'll develop a solid understanding across the subject by studying a broad range of advanced topics. You will also learn about how psychology engages with other disciplines, such as management, neuroscience, political science and psychiatry.</p> <p>Year 1 focuses on building your knowledge of the basic concepts, methods and theories of psychology. You'll study biological, cognitive, developmental and social psychology, and their applications. You will learn how to be creative and rigorous in research design and analysis.</p> <p>Year 2 is your chance to advance your knowledge in the core areas of psychology, such as cognitive neuroscience, social psychology and developmental psychology. You'll extend your research methods, skills and project work. You will also select optional units in both semesters.</p> <p>In your final year, you'll complete your dissertation and learn about psychology solutions to real-world challenges. You'll choose from a wide range of optional units related to current research topics and the expertise of academic staff. These often cover areas that aren't always found in other psychology degrees.</p>
Learning and teaching	<p>Informed teaching to advance your learning</p> <p>You'll learn from teaching staff with expertise in different areas of psychology, such as:</p> <ul style="list-style-type: none">- clinical- cognitive- developmental- environmental- health

- neuroscience
- social

Their passion, knowledge and research inform our teaching to provide you with exposure to a contemporary research environment.

Contact hours

Contact hours

Timetabled contact hours, which may be made up of lectures, practical sessions, seminars, tutorials and workshops, vary throughout your course and between courses but are typically between 8 and 10 hours a week in your first year.

Our teaching for this course is delivered through in-person learning on campus, supported by high quality online provision. A small proportion of these contact hours may be delivered online, with the significant majority taught on campus. This may be supplemented by additional activities such as a small number of online learning sessions (not live), skills development sessions, and personal tutorials.

The amount of timetabled sessions on campus in later years may vary based on the options you choose, with a greater emphasis on independent learning. Project and dissertation units will generally have fewer scheduled sessions to allow you time for your independent work - this may also mean the number of hours of timetabled sessions each week will vary within a year.

Independent learning

In addition to timetabled contact hours, you are expected to undertake independent learning and assessment activities. Typically, this might be around 25 to 32 hours per week in your first year, and include individual research, reading journal articles and books, working on individual and group projects, preparing coursework assignments, presentations, or revising for exams. After your first year, the emphasis on independent learning becomes greater, for example, you may do a final year project in the final year.

Delivery methods

Lectures
Practical sessions
Seminars
Tutorials
Workshops

Assessment summary

You will be assessed by a range of methods designed to develop and test your skills and knowledge.

25% to 50% of your course will be assessed through examinations.

50% to 75% will be assessed through essays, reports, and presentations.

The balance of assessment methods will vary throughout your degree.

In your final year, you will be expected to complete a dissertation.

You will primarily be assessed as an individual but may also be assessed as part of a group.

We can make reasonable adjustments to assessment procedures for students with disabilities, take a look at our Disability Service's pages(/professional-services/disability-service) for information.

Placement/Study Year Abroad details

You will do a work placement in Year 3. This is an opportunity to use what you've learnt in a practical context and enhance your CV. This is an opportunity to use what you've learnt in a practical context and enhance your CV.

You'll work with professional psychologists and related professionals, to develop invaluable skills and knowledge. You'll find out about the organisation you join and how it works, and learn more about potential future careers.

Typically, you'll gain skills like, planning, problem-solving, decision making and project management.

Many employers value placements, which may help you to progress with your career after graduation.

Previous students have been on placements at organisations including:

- Centre for Research in Autism and Education
- CybSafe
- Great Ormond Street Hospital
- Inspectorate of Prisons
- National Crime Agency

Our students have also done placements at universities in different countries, including New Zealand and the United States.

It's your responsibility to arrange placements, but you'll be supported by our specialist team.

Develop your professional skills

We work to prepare you for employment and further study.

This includes support from your personal tutor, CV writing workshops, interview preparation, a research apprenticeship scheme, and professional skills training.

These opportunities will help to make you more suitable for employers and postgraduate programmes, as well as placement, apprenticeship, and internship providers.

Prepare for your future

A psychology degree can prepare you for behaviour science, clinical, health, educational, market research, and occupational roles. Psychology degrees are often also valued in communications, management, police work, and social research.

Recent graduate destinations include:

- HM Treasury
- Mind
- NHS
- SEN School
- Unilever

Many professional psychology roles require further specialist training.

This course is accredited by and confers eligibility for Graduate Basis for Chartered Membership of the British Psychological Society.
