Course mode of delivery	Thick sandwich (Full-time on campus)
Course length	4 years
Entry point	September 2024
Main location of study	University of Bath, Main Campus, Claverton Down
Course-owning school/department	Social & Policy Sciences

Course Description

Course Summary Explore social justice and welfare issues to understand the key questions and challenges society faces around rights, equality and distribution of resources.

Course Description On this course, you'll learn about the social and political foundations of policies that affect people's lives. You'll study the impact social policy has on identity, political organisations, social justice and human rights.

You'll explore the origins and evolution of state-run institutions, and their relationship with the economy and third sector in the UK and beyond. This will increase your understanding of contemporary social welfare issues at local, national and international levels.

Year 1 is your introduction to becoming a social scientist. You'll explore social change and how social issues become constructed as policy problems. You'll also learn about the major social, political and economic factors shaping equality and welfare in modern Britain.

In Year 2, you will focus on key policy areas such as the family, poverty, social inequality, and analysis of the policy process. You'll learn how to evaluate data and information to develop your own arguments for different audiences. You'll also choose from a range of social science optional units.

In your final year, you will do your dissertation, and study the relationship between social research, policy making and governance. You'll also choose from a range of optional units from across the social sciences. These will allow you to build upon the theoretical understanding you'll gain during Years 1 and 2 and apply it to contemporary sociological issues.

The flexibility of this course will allow you to create a degree that's tailored to your interests and potential future career.

Informed teaching to advance your learning

You'll learn from teaching staff with diverse backgrounds and expertise in social policy. Their passion, knowledge and research shape their teaching to give you the foundation to become a critical-minded social scientist.

Develop your professional skills

We work to provide you with the skills and support to prepare you for employment and further study. These include:

- data analysis
- using a range of methods to produce data
- communication and presentation skills.

Contact hours

Contact hours

Timetabled contact hours, which may be made up of laboratory sessions, lectures, seminars, tutorials and workshops, vary throughout your course and between courses but are typically around 10 hours a week in your first year.

Our teaching for this course is delivered through in-person learning on campus, supported by high quality online provision. A small proportion of these contact hours may be delivered online, with the significant majority taught on campus. This may be supplemented by additional activities such as a small number of online learning sessions (not live), skills development sessions, and personal tutorials.

The amount of timetabled sessions on campus in later years may vary based on the options you choose, with a greater emphasis on independent learning. Project and dissertation units will generally have fewer scheduled sessions to allow you time for your independent work - this may also mean the number of hours of timetabled sessions each week will vary within a year.

Independent learning

In addition to timetabled contact hours, you are expected to undertake independent learning and assessment activities. Typically, this might be around 25 to 30 hours per week in your first year, and include individual and group projects, preparing coursework assignments, presentations, or revising for exams. After your first year, the emphasis on independent learning becomes greater, for example, you may do a final year project in the final year. You'll be expected to work both on your own and as part of a group.

Delivery methods

Laboratory sessions
Lectures
Seminars
Tutorials
Workshops

Assessment summary

You will be assessed in a range of methods designed to develop and test your skills and knowledge.

10% to 25% of your course will be assessed through examinations.

75% to 90% will be assessed through essays, reports, and presentations.

The final degree classification is determined by your second and final year marks and each contributes 32% and 68% respectively.

You will primarily be assessed as an individual, but may also be assessed as part of a group.

We can make reasonable adjustments to assessment procedures for students with disabilities, take a look at our Disability Service's pages(/professional-services/disability-service/) for information.

Placement/Study Year Abroad details

Essay

Doing a professional placement allows you to use what you've learnt in a practical context and enhance your CV. You'll find out about the organisation you join and how it works, while learning more about potential future careers. Some students have been offered graduate roles following placements.

You'll develop skills like planning, problem-solving, decision making and project management.

Employers often value placements, so you could gain an advantage in the job market.

We have established links and partnerships with many organisations.

Previous students on similar courses have done their placements with commercial, voluntary or government organisations, or in research settings. These have included:

- Bedfordshire Police
- Bank of England
- Home Office
- Tanzanian Development Trust

Placement opportunities can't be guaranteed but you will receive tailored support from our dedicated placement team.

Prepare for your future career

Many of our social sciences graduates have gone on to work as social and policy researchers, civil servants, international consultants, journalists, and accountants.

They've gone on to work in:

- government departments
- social enterprises and charities
- European and international agencies and organisations
- Social care and family services
- international development
- public policy consultancy
