General Information						
Title	BEng (Hons) Aerospace Engineering					
Awarding Institution	University of Bath					
Teaching Institution	University of Bath					
Programme Accredited by	IMechE January 2014 / RAeS January 2014					
Collaborative Provision Type	Not Applicable <input type="checkbox"/>					
Placement Available?	Yes <input checked="" type="checkbox"/>					
Study Abroad Available?	Select.. <input type="checkbox"/>					
Subject Benchmark Statement(s) Click here to see 'QAA List'	Engineering: http://www.qaa.ac.uk/en/Publications/Documents/Subject-benchmark-statement-Engineering-.pdf					
Programme Approved by	Senate Minute 10030, 20 March 1996					
Aims	Learning Outcomes	Assessment	Placement/Prof Acc	Admissions/Support	Show All	Close
Aims; "What is the purpose of this programme of study? What is the programme intended to achieve?"						
Synopsis and Coherence	<p>Synopsis</p> <p>The first two years provide a core foundation curriculum with 66 credits (equivalent to 132 CATS Credits) in Mechanical Engineering Science and Manufacturing, 24 credits in Mathematics and Computing topics, 24 credits of Design and Materials and 6 credits of Experimentation and Applied Engineering. All units are compulsory in years one and two.</p> <p>The third year may be spent on a period of supervised industrial training.</p> <p>The third academic year includes, as core material, 30 credits of Aerospace Engineering topics in semester one, a six week 12 credit full-time Group Business and Design Project and a six week 18 credit full time engineering project that takes place in the second semester.</p> <p>Academic Coherence</p> <p>The curriculum has been designed to provide for those students who want a general mechanical engineering education combined with Aerospace Engineering related units in the third year. Design is a common thread that runs through the degree programme and integrates taught engineering science, manufacturing and management elements in project based engineering activities.</p> <p>The first two years of the programme lay the foundations of the common mechanical principles and give students a view of most of the important areas of mechanical engineering, including design and manufacture. The final year enables the student to specialise in Aerospace Engineering to Honours level study. Full-time group and individual project work provide opportunities to apply the lecture material to the solution of practical problems and to introduce the elements of the management of an engineering enterprise.</p>					
Educational Aims of the Programme						

	<p>Aims</p> <ul style="list-style-type: none"> • To enable students to pursue professional careers in Aerospace Engineering at a level which requires the exercise of sound judgement, personal responsibility and initiative, and the ability to make engineering decisions. • To equip students with a detailed understanding of the principles of mechanical engineering science, many aspects of which will be at, or informed by, the current boundaries of the discipline. • To equip students with skills to systematically employ engineering principles to produce original analyses of, and solutions to, engineering problems. • To enable students to work successfully in engineering teams <p>Objectives</p> <p>It is expected that graduates of this programme will meet the educational requirements for the award of a BEng degree. It is intended that all graduates will satisfy the UK SPEC Learning Outcomes from C to H Level and will have experienced a wide range of delivery and assessment strategies.</p> <p>To this end the objectives of the programme will be to prepare graduates to:</p> <ul style="list-style-type: none"> • use their knowledge and understanding of mechanical science to produce soundly based solutions to engineering problems, through the detailed evaluation of available evidence, arguments and assumptions; • apply theoretical and practical techniques to produce creative analyses of, and solutions to, engineering problems in familiar environments; • provide a high level of technical leadership; • use initiative, effective communication and interpersonal skills; • operate within the appropriate code of professional conduct, recognising obligations to society, the profession and the environment.
<p>Learning Outcomes; including teaching, learning and assessment methods, specifying those applicable for interim awards where appropriate. Indicate what successful students should be able to do, how well they should be able to do it and the context or conditions in which they should be able to do it. See also FHEQ and SEEC guidance.</p>	
<p>Knowledge and Understanding</p>	<p>Students will demonstrate:</p> <ul style="list-style-type: none"> • systematic and detailed understanding of mechanical science, ranging from the well-established principles to new techniques; • detailed knowledge of a number of the practical technologies currently used in Aerospace Engineering; • critical understanding of the uncertainty, ambiguity and limits of their knowledge, and how these may affect analyses of, and solutions to, engineering problems; • awareness of the commercial and financial constraints that engineers may have to work under. <p>Teaching and learning is through lectures, tutorials, students' own reading, practical exercises, laboratory work and design exercises.</p> <p>Assessment is by a combination of written examination, written course work and oral presentation.</p>
<p>Intellectual Skills</p>	<p>Students will demonstrate an:</p> <ul style="list-style-type: none"> • ability to apply the concepts and principles of mechanical engineering science to the solution of engineering problems in both familiar and in complex professional environments; • ability to evaluate information in the form of arguments, assumptions and/or technical data (that may or may not be complete) in order to be able to produce solutions to problems in Aerospace Engineering that may be either of a routine nature or require the development of new techniques. <p>Teaching and learning is through lectures, tutorials, students' own reading, practical exercises, laboratory work and design exercises.</p> <p>Assessment is by a combination of written examination, written course work and oral presentation.</p>
<p>Professional Practice Skills</p>	<p>Students will be able to:</p> <ul style="list-style-type: none"> • employ a range of established and new techniques to review and analyse information concerning engineering problems, and to propose and implement solutions in a professional manner; • deal with complex engineering issues, both systematically and creatively, make sound judgements in the absence of complete data, and communicate their conclusions clearly to both specialist and non-specialist audiences; • undertake further continuing professional development and the development of new skills that will enable them to assume a high level of responsibility within an engineering organisation. <p>Teaching and learning is through lectures, tutorials, students' own reading, practical exercises, laboratory work and design exercises.</p> <p>Assessment is by a combination of written examination, written course work and oral presentation.</p>

<p>Transferable/Key Skills</p>	<p>Students will demonstrate:</p> <ul style="list-style-type: none"> • an ability to use IT to collect, analyse and present technical information; • an ability to use appropriate professional simulation and design tools; • the exercise of initiative and personal responsibility; • an ability to effectively present technical information in both written and spoken form; • independent learning ability required for continuing professional development; • how to plan and execute a project. <p>Teaching and learning is through lectures, tutorials, students' own reading, practical exercises, laboratory work and design exercises.</p> <p>Assessment is by a combination of written examination, written course work and oral presentation.</p>
<p>Assessment Methods</p>	
<p>Summary of Assessment Regulations</p>	<p>NFA - fully compliant <input type="checkbox"/></p>
<p>Progression Regulations and Awards</p> <p><i>For programmes fully compliant with NFA refer to the relevant appendices of the relevant NFAAR document (UG, PGT, FD, HY, or CPD)</i></p> <p><i>Note any significant features relevant to the "Assessment in the programme context" sections of the relevant NFAAR document.</i></p> <p><i>Set out any approved exemptions from NFA.</i></p> <p><i>Set out progression and assessment regulations where these do not comply with NFA.</i></p>	<p>Students leaving an undergraduate programme prematurely may be eligible for a Certificate of Higher Education (www.bath.ac.uk/quality/documents/certhe.pdf) or a Diploma of Higher Education (www.bath.ac.uk/quality/documents/diplhe.pdf)</p> <p>The rules for progression from one stage to another and grading of assessed work and examinations conform to the University's framework for assessment and assessment regulations (NFAAR), see http://www.bath.ac.uk/registry/nfa/nfaar-ug.pdf</p>
<p><i>Students leaving an undergraduate programme prematurely may be eligible for a Certificate of Higher Education or a Diploma of Higher Education.</i></p>	
<p>Click here to see 'Indicators of Quality & Standards'</p>	
<p>Placement and Professional Accreditation</p>	
<p>Details of Work Placements Requirements / Work Based Learning / Industrial Training Requirements</p>	<p>Students on the sandwich programme will undertake a placement of at least thirty weeks during the third year. An informal report on the placement will be produced and 60 credits will be awarded for successful completion of the placement year although this will not contribute to the degree classification.</p>
<p>Details of Study Abroad Requirements</p>	
<p>Details of Professional Accreditation</p>	
<p>Admissions and Support</p>	
<p>Admissions Criteria including APL/APEL arrangements</p> <p><i>Only refer to APL, APEL or direct entry with advanced standing if regular use is likely to be made or is not possible.</i></p>	<p>Admissions Criteria can be found by following the link below:</p> <p>http://www.bath.ac.uk/study/ug/prospectus/subject/mechanical-engineering/entry-requirements/</p>
<p>Details of Support Available to Students</p> <p>[link to Ac Reg quality page]</p>	

<p>Department and Programme Specific Support Information</p> <p><i>e.g. induction programmes, any peer mentoring schemes, regular department events</i></p>	<p>Further information about the Department is available at http://www.bath.ac.uk/mech-eng/</p> <p>Information relating to the various degree course programmes and units is available at http://www.bath.ac.uk/catalogues/</p>

Business Support Systems - part of Computing Services

BEng(Hons) Aerospace Engineering - Being delivered 2017/2018
UEME-AFB26

+

NFAAR Version	UG <input type="checkbox"/>
Length	3 Years
Mode of Attendance	Full-time
Mode of Placement	None
Type of Placement	None
Intended Award	Bachelor of Engineering with Honours
Award Title	BACHELOR OF ENGINEERING IN AEROSPACE ENGINEERING
For UG Masters Type Programmes this is	
Exit Awards	UEME-AFC04 Certificate of Higher Education UEME-AFL04 Diploma of Higher Education
Exit Award Rules	
Designated Alternative Programmes
