Preface	ix
<u>Energy Efficiency and the Environment</u>	
Calculation of the energy efficiency of a modern hydraulic injection moulding machine <i>(J Weingart, S Helduser, Technical University of Dresden, Germany)</i>	3
Improving efficiency in a linear cyclic motion <i>(S Haikio, K Huhtala, M Vilenius, J Makitalo, Tampere University of Technology, Finland)</i>	15
Cross utilizing degree of freedoms of boom in energy saving concept <i>(T Virvalo, J Seppälä, Tampere University of Technology, Finland)</i>	31
Energy recovery of hydraulic elevator using accumulator <i>(H Yang, B Xu, W Sun, J Lin, Zhejiang University, China)</i>	45
<u>Hydraulic Fluids, Sensors and Testing I</u>	
High-pressure properties of hydraulic fluids - measuring and differences <i>(J-P Karjalainen, R Karjalainen, K Huhtala, M Vilenius, Tampere University of Technology, Finland)</i>	67
A multi-sensor for monitoring the oil condition of mobile working machines in operation <i>(H-H Harms, J Krallmann, University of Braunschweig, Germany)</i>	81
A quasi-single pass test method for fluid power filters <i>(E Urata, K Suzuki, Y Kato, Kanagawa University, Japan)</i>	95
<u>Pumps, Fluid Dynamics and Noise</u>	
3D viscid periodic wave propagation in hydraulic systems <i>(R Scheidl, B Manhartgruber, Johannes Kepler University, Austria)</i>	109
Overcoming of self-excited oscillations and noise in hydraulic jet pipe servo-valve using magnetic fluid <i>(S Li, S Jia, S Wang, Harbin Institute of Technology, China)</i>	121
Containing the cup in the floating cup axial piston machine <i>(T.L. van den Brink, P A J Achten, Innas BV, The Netherlands)</i>	131
A numerical model for the simulation of flow in hydraulic external gear machines <i>(P Casoli, A Vacca, G L Berta, Università degli Studi di Parma, Italy)</i>	147

Pneumatics

- Force control at low cost in pneumatic field 169
(X Brun, M Smaoui, J-M Retif, XFL Shi, E Bideaux, INSA Lyon, France)
- Self-organising maps for monitoring pneumatic systems 181
(A Zachrisson, M Sethson, Linköping University, Sweden)
- Pneumatic servovalve models using artificial neural networks 195
(J F Carneiro, F Gomes de Almeida, University of Porto, Portugal)

Applications

- Comparison of EMA and HA performance for dynamic load simulators 211
(W Karam, J-C Mare, INSA Toulouse, France)
- Modelling and control of marine engineering systems 225
(T Heeringa, Boskalis Westminster Dredging, The Netherlands)
- Design and implementation of a water hydraulic 6-DOF motion platform for real-time simulators 251
(T Palonen, M Rokala, H Sairiala, J Uusi-Heikkilä, M Hyvönen, K Koskinen, Tampere University of Technology, Finland)
- Developing intelligent hydraulic excavator 265
(O Karhu, J Vilenius, J Uusisalo, K Huhtala, Tampere University of Technology, Finland)

Systems and Control

- A new acceleration feedback design method for electrohydraulic motion control systems 277
(A R Plummer, Instron Ltd UK)
- Force-based impedance control of hydraulic manipulators and its relationship with position-based impedance control 291
(A Muhammad, J Mattila, M Siuko, M Vilenius, Tampere University of Technology, Finland)
- Detecting and influence of cylinder mounting backlash in a hydraulic position servo 305
(E Mäkinen, T Virvalo, Tampere University of Technology, Finland)

Hydraulic Fluids, Sensors and Testing II

Design of integrated pressure,-flow and temperature sensor for hydraulic systems <i>(C W Groepper, P Y Li, T Cui, K A Stelson, University of Minnesota, USA)</i>	321
A test-rig for the characterisation of fast check valves <i>(A Plöckinger, B Manhartsgruber, Johannes Kepler University, Austria)</i>	335
Test methods for flow sharing directional valves <i>(P Marani, G Ansaloni, R Paoluzzi, Imamoter CNR, Italy, A Fornaciari, Walvoil SpA, Italy)</i>	347
<u>High Performance Valves</u>	
A hydraulic control valve for PWM actuation at 400 Hz <i>(B Manhartsgruber, Johannes Kepler University, Austria)</i>	373
Optimization of a fast switching valve for big flow rates <i>(B Winkler, R Scheidl, Johannes Kepler University, Austria)</i>	387
New concepts and design of high response hydraulic valves using piezo technology <i>(M Reichert, H Murrenhoff, University of Aachen, Germany)</i>	401
A novel seat valve with reduced axial forces <i>(T Lauttamus, M Linjama, M Nurmia, M Vilenius, Tampere University of Technology, Finland, M Nurmia University of Jyväskylä, Finland)</i>	415
Piloting the valve spool by using a through axial shaft <i>(M A Elgamil, Cairo University, Egypt)</i>	429
Authors' Index	437
