Contents

Preface iv

Pumps and motors

A novel approach to predict the cylinder block / valve plate interface performance in swash plate type axial piston machines
 Marco Zecchi, Prof. Dr.-Ing. Monika Ivantysynova 13

Optimal Design of Gears and Lateral Bushes of External Gear Machines
 Ram Sudarsan Devendran, Andrea Vacca 29

Friction measurement of plunger bushing contact in fuel injection pumps
 Sebastian Drumm, Stefan Heitzig, Hubertus Murrenhoff 51

Geometric Features of Gerotor Pumps Analytic vs Cad Methods
 Gianluca Carconi, Cristian D’Arcano, Nicola Nervegna, Massimo Rundo 59

Efficient Fluid Power

Thermal Insulation in Enhancing Performance Characteristics of Hydraulic Accumulator
 J. Juhala, J. Kajaste, M. Pietola 81

Energy-efficient electrohydraulic compact drives for low power applications
 Dipl.-Ing. Sebastian Michel, Professor Dr.-Ing. Jürgen Weber 93

Optimizing Hydraulic Energy Recovery System of Reach Truck
 H. Hänninen, J. Kajaste, M. Pietola 109

Minimizing the Power Dissipation in the Piston-Cylinder Gap Using a Barrel-Shaped Piston
 Kim A. Stelson, Feng Wang 123
Digital Hydraulics

Digital Hydraulic Pressure Relief Function

Analysis of Dynamic Properties of a Fast Switching On-Off Valve for Digital Displacement Pumps
  Daniel B. Rømer, Per Johansen, Henrik C. Pedersen, Torben O. Andersen

Active control of pressure pulsation in a switched inertance hydraulic system using a rectangular-wave reference signal
  Min Pan, Nigel Johnston, Andrew Hillis

Control I

A Sliding Mode Controller Based on the Interacting Multiple Model Strategy
  M. A. El Sayed, S. A. Gadsden, S. R. Habibi

Hydraulic servoactuator for adaptive force control of fast trains pantographs
  Davide Ferrara, Giovanni Jacazio, Andrea Mornacchi, Stefano Pastorelli, Massimo Sorli

Issues of sensor noise, bandwidth and sampling time in PID pressure control
  Matthias Liermann

Overshoot and steady-state error of hydraulic press driven by DCV-positioned pump-controlled asymmetric cylinder
  Jianfeng Tao, Haiyan Yang, Guofang Gong, Chengliang Liu

Pneumatics I

A Pneumatic Position Servo Based on On/Off Valve Actuated Muscle Actuators in Opposing Pair Configuration
  Ville Jouppila, Asko Ellman

Implementation and Analysis of a Pneumatic Pipe Model
  Jan Elvers, Hubertus Murrenhoff

Investigation on the Efficiency of Pneumatic System Using Air Power
  Toshiharu Kagawa, Maolin Cai, Xin Li

Sliding Mode Control of an MRI-Compatible Pneumatically Actuated Robot
  David B. Comber, Diana Cardona, Robert J. Webster, III, Eric J. Barth
Control II

A Combined Multiple Inner Loop Control Strategy for an Electro-Hydraulic Actuator
Mohammed A. El Sayed, Saeid Habibi

The Fractional Order PID Control of Hydraulic Position System Based on Internet
Shi Guanglin, Wang Ruigang, Xu Zhenyin

Deterministic Control Strategy for a Hybrid Hydraulic System with Intermediate Pressure Line
Dipl.-Ing. Peter Dengler, Prof. Dr.-Ing. Marcus Geimer, Dipl.-Ing. René von Dombrowski

Proportional control system design and probability of stability for a pilot operated proportional valve with parametric uncertainty
Richard Carpenter, Roger Fales

Control and Modelling

Optimizing Dynamic Properties of Hydraulic Actuator for Hardware-in-the-Loop Damper Testing
T. Saarikoski, J. Kajaste, M. Pietola

Dynamic Modelling of a Linear Friction Welding Machine actuation system
D.T. Williams, P. Wilson, A. R. Plummer

Multivariable Backstepping Controls of a High Bandwidth Electro-hydraulic Actuator
Yaozhong Xu, Lilia Sidhom, Eric Bideaux, Mohamed Smaoui

Analysis of Two Typical Thrust Electro-hydraulic Control Systems for Shield Tunneling Machine
Weiqiang Wu, Guofang Gong, Hu Shi
Modelling and Simulation

System Modelling and Bulk Modulus Estimation of an Electrohydrostatic Actuator

Y. Song, S. A. Gadsden, S. A. El Delbari, S. R. Habibi

Modeling of a Proportional Valve by MCMC Method

Junhong Liu, Huapeng Wu, Heikki Handroos, Heikki Haario

Steady and Unsteady Flow Force acting on a Spool Valve

Kazuhiro Tanaka, Keitaro Kamata, Kouki Tomioka, Takeshi Yamaguchi

Effective Bulk Modulus Model Verification for the Mixture of Air/Gas and Oil

H. Gholizadeh, D. Bitner, R. Burton, G. Schoenau

Automotive and Aerospace Application

Optimal Sizing of Pipe Networks in Aircraft Hydraulic System Preliminary Design

C. Dunker, F. Thielecke, T. Homann

Coupling Displacement Controlled Actuation with Power Split Transmissions in Hydraulic Hybrid Systems for Off-Highway Vehicles

Michael Sprengel, Dr. Monika Ivantysynova

Fault-tolerant steer-by-wire valve for agricultural tractors based on independent metering with on/off valves

Dipl.-Ing. David Schmitz, Prof. Dr.-Ing. Marcus Geimer

Generation of power transmission architectures for redundant actuators

Amine Fraj, Jean-Charles Mare, Marc Budinger
Renewable Energy

Design and Control of Full Scale Wave Energy Simulator System
Henrik C. Pedersen, Anders H. Hansen, Rico H. Hansen, Torben O. Andersen, Michael M. Bech

Determining Required Valve Performance for Discrete Control of PTO Cylinders for Wave Energy
Rico H. Hansen, Torben O. Andersen and Henrik C. Pedersen

Wind turbines with variable hydraulic transmissions and electrically excited synchronous generators directly connected to the grid
Peter Chapple, Michael Niss, Knud Erik Thomsen

Pneumatics II

Design of a Figure-Eight free-liquid-piston engine compressor for compact robot power
Mark E Hofacker, Mengze Sun, Eric J Barth

Test rig and Simulation Software for Performance Comparison of Pneumatic Servo Controllers Given three Actuator Setups and five Circuit Configurations of Control Valve
Ramhuzaini Abd. Rahman, Nariman Sepehri

Development of a Low Noise Pressure Reducing Valve for High Pressure Hydrogen Using a Radial Slit Structure
Chongho Youn, Yoshinari Nakamura, Toshiharu Kagawa
