

Suggested taxonomy for tagging images

Names in bold shouldn't be used as tags themselves - they're more to group tags into different areas.

This list was created assuming it was possible to nest tags within each other, but they should work on their own as well. I also assumed that it would be possible to have multiple tags at once - if this not possible then a rethink would be required.

- **Places**
 - **Buildings**
 - 1 East
 - 2 East
 - 3 East
 - 4 East
 - 6 East
 - 8 East
 - 4 East South
 - 1 South
 - 2 South
