Subject Benchmark Statement*Subject Benchmark Statement:	Psychology http://www.qaa.ac.uk/Publications/InformationAndGuidance/Documents/Psychology2010.pdf
Date of Specification preparation/revision	
Applicable to cohorts	
Programme Approved by	

Synopsis and academic coherence of programme

The 3 year full time Undergraduate Psychology Degree is currently accredited by the British Psychological Society. The Psychology degree programme follows a semester-based structure with 60 credits of study in each year. The programme consists of a core of about 80% psychology and psychology research methods units. The other 20% of the units in the first and second year are optional units. These units allow students to broaden their focus. In addition to optional psychology units, the programmes offers the opportunity to follow additional units in Languages, Sociology/Social Policy, Education, Sports Science, Neuroscience, Biology and Management. In the first year, the foundations are laid for understanding basic concepts, methods and theories in psychology. In the second year the degree covers the core areas of psychology, and introduces more research methods, including project work. The final year for students on the BSc (Hons) Psychology programmes consists of a research dissertation and a range of psychology optional units, which reflect the active research interests of the Department and an individual research project.

The degree is studied as a three-year full-time programme. The programme is arranged on a semester basis (6 x 15 weeks). The programme is divided into study modules called units. Each unit has a credit value of 6 - 18, depending on the length of study and academic content, and according to subject and nature of learning. Each 6-credit unit represents 100 hours of student learning made up of lectures, tutorials, seminars, practical classes and workshops.

Educational aims of the programme

1. Offer students an education in psychology that reflects the highest academic standards and is supported by high quality teaching;
2. Offer a high-technology learning environment with access to information and communication technology (ICT), well-equipped laboratories and specialist equipment;
3. A commitment to the integration of the strong research profile into teaching;
4. A commitment to appropriate diversity of entry and approaches to learning, teaching and assessment.
5. To educate undergraduate students to the required level in psychology for them to be able to pursue professional training and careers in psychology or related fields.

• Knowledge & Understanding:

- Understands the scientific underpinnings of psychology as a discipline, its historical origins, development and limitations.
- Recognises the inherent variability and diversity of psychological functioning and its significance.
- Can demonstrate systematic knowledge and critical understanding of a range of influences on psychological functioning, how they are conceptualised across the core areas, and how they interrelate. The core knowledge domains within psychology include (i) research methods, (ii) biological psychology, (iii) cognitive psychology, (iv) individual differences, (v) developmental psychology and (vi) social psychology. In addition to these core areas it is expected that students will gain knowledge of conceptual and historical perspectives in psychology.
- Has detailed knowledge of several specialised areas and/or applications, some of which are at the cutting edge of research in the discipline.
- Can demonstrate a systematic knowledge of a range of research paradigms, research methods and measurement techniques, including statistical analysis, and be aware of their limitations.

<ul style="list-style-type: none"> • Intellectual Skills: 	<ul style="list-style-type: none"> • Can reason scientifically, understand the role of evidence and make critical judgements about arguments in psychology. • Can adopt multiple perspectives and systematically analyse the relationships between them. • Can detect meaningful patterns in behaviour and experience and evaluate their significance. • Can pose, operationalise and critically evaluate research questions. • Can demonstrate substantial competence in research skills through practical activities. • Can demonstrate competence in a range of qualitative research methods • Can reason statistically and use a range of statistical methods with confidence. • Can competently initiate, design, conduct and report an empirically-based research project under appropriate supervision, and can recognise its theoretical, practical and methodological implications and limitations. • Is aware of the ethical context of psychology as a discipline and can demonstrate this in relation to personal study, particularly with regard to the research project.
<ul style="list-style-type: none"> • Professional Practical Skills: 	<ul style="list-style-type: none"> • To reflect upon new technology and innovation within psychology and to make decisions regarding legitimacy, reliability and effectiveness. • To effectively and efficiently apply principles of psychological analysis within a variety of environments. • To develop sensitivity to the values and interests of others.
<ul style="list-style-type: none"> • Transferable/Key Skills: 	<ul style="list-style-type: none"> • Can communicate ideas and research findings both effectively and fluently by written, oral and visual means. • Can comprehend and use numerical, statistical and other forms of data, particularly in the context of presenting and analysing complex data sets. • Is computer literate and is confident in using word processing, database and statistical software. • Can solve problems by clarifying questions, considering alternative solutions and evaluating outcomes. • Is sensitive to and can react appropriately to contextual and interpersonal factors in groups and teams. • Can undertake self-directed study and project management in order to meet desired objectives. • Is able to take charge of their own learning, and can reflect and evaluate personal strengths and weaknesses for the purposes of future learning.
Summary of assessment and progression regulations	
NFA - fully compliant	
Progression Regulations and Awards	
UHPS-AFB03 The rules for progression from one stage to another and grading of assessed work and examinations conform to the University's framework for assessment and assessment regulations (NFAAR), see http://www.bath.ac.uk/registry/nfa/nfaar.pdf	
Details of Work Placements Requirements / Work Based Learning / Industrial Training Requirements	
Details of Study Abroad Requirements

Details of Support Available to Students

University of Bath students attending programmes of study at the Claverton Campus are usually encouraged to stay in University halls of residence during their first year and will be supported in their transition into University life and study by Resident Tutors. These are postgraduate students or staff who live in the halls of residence and are responsible for the general welfare, health and safety and discipline of student residents.

Undergraduate students will be allocated a Personal Tutor, postgraduate taught students a course manager and postgraduate research students a supervisor who are responsible for monitoring and supporting the academic progress and general welfare of their students.

Staff in these roles will be able to respond to many of the questions and concerns raised by their students. However, there is also a range of specialist student support services that will offer both information and advice to support these staff working with their students, as well as take referrals to work more directly with the students. Students can also self-refer to these services.

These services can provide information, advice and support in relation to accommodation, emotional difficulties, assessment of needs and provision of support relating to disability, student funding, general welfare, academic problems, student discipline and complaints, careers, international students, spiritual matters, part time work, security and personal safety. The Students' Union can also provide advocacy for students. More information about these services can be accessed via: <http://www.bath.ac.uk/students/support/>.

There are also Medical and Dental Centres, and a Chaplaincy on campus that are very experienced in meeting the needs of a student population, as well as a University nursery and vacation play scheme to provide childcare for older children during the school holidays
