Distance Learning Provision

1. Purpose and scope	1
2. Principles	2
3. Approval of distance learning programmes	2
4. Evaluation of learning opportunities	3
5. Support for students.....	3
6. Assessment	4
7. Premature termination of work-based learning opportunity.....	5
8. Use of technology	5
9. Equipping staff to undertake their roles	5
10. Monitoring and review	5

1. Purpose and scope

- 1.1 The purpose of this statement is to set out mechanisms for the quality assurance of:
- distance learning and
 - work-based learning on distance learning programmes and apprenticeships
- 1.2 Distance learning is learning which takes place remotely from the University but which is part of a programme or unit of study. Distance learning programmes may be delivered through paper-based materials, a virtual learning environment, travelling teachers, use of local agents or partner organisations.
- 1.3 Work-based learning is learning that is integral to the programme of study and is usually achieved and demonstrated through engagement with a workplace environment, the assessment of reflective practice and the designation of appropriate learning outcomes. Work-based learning might also be described as “professional practice”.
- 1.4 This statement covers:
- units and programmes of study designed and approved by the University and leading to an award or award of credit of the University but taught and/or supported at a distance
 - programmes or units taught at a distance, designed and approved by the University and leading to an award or award of credit of the University, where an overseas institution acts as a facilitator (including study centres providing a location for teaching)
 - the requirements of distance learning students in full or part time employment who use experience gained in their workplace to meet the learning outcomes of the programme i.e. “work-based learners”.

- 1.5 This statement does not cover arrangements for placement learning in which students undertake an agreed and negotiated period of learning away from the University, usually in employment, as part of their programme of study or arrangements for work-based learning where periods of study on campus or at a partner organisation are interspersed with short placements (i.e. Foundation Degrees). Provision for placement learning and work-based learning on foundation degrees is covered in [QA6 Placement Learning](#).
- 1.6 This statement should be read in conjunction with:
- [QA20 Collaborative Provision](#) (if collaboration with a partner institution is intended)
 - [QA3 Approval of New Programmes of Study](#)
 - [QA4 Amendments to Programmes of Study and Approval of New Units](#).

2. Principles

- 2.1 The University promotes inclusive and flexible learning provision in order to respond to and support student diversity and the needs of practising professionals.
- 2.2 Work-based learning contributes to a student's personal and professional development and thereby improves their employment prospects.
- 2.3 The University aims to secure the high quality and standard of units, programmes and awards taught and supported on a distance learning basis ensuring comparability with programmes delivered on campus of a similar nature.

3. Approval of distance learning programmes

- 3.1 The Head of Department is responsible for ensuring that new programmes with a distance learning element are developed in accordance with the principles in this statement.
- 3.2 It is the responsibility of Academic Programmes Committee to give strategic approval for new distance learning programmes, ensuring that they are set within the context of the University's Mission and are compatible with the University Strategy.
- 3.3 It is the responsibility of Boards of Studies to approve the appointment of all staff outside the academic and research job family who teach on distance learning programmes.
- 3.4 When developing new programmes of study, advice should be sought from Departments/School with expertise in the area of distance learning (e.g. Health/Education) and from the Technology Enhanced Learning (TEL) and the Curriculum Development team and team in the Centre for Learning and Teaching (CLT).
- 3.5 In establishing new distance learning programmes, the process in [QA3 Approval of New Programmes of Study](#) should be followed. In addition to the requirements of QA3, the following information should be provided to Course and Partnerships Approval Committee (CPAC) to ensure that appropriate academic standards and learning environment can be achieved within the distance learning infrastructure:
- details of the logistical and administrative arrangements to ensure effective co-ordination of the programme and any residential elements, if appropriate, taking full account of considerations specific to teaching and supporting students at a distance
 - details of the proposed learning materials and delivery mechanisms

- an outline of the roles and responsibilities of the different parties involved if delivered in collaboration with a partner institution (including details of reporting arrangements)
 - details of the responsibilities and financial agreements with the relevant academic Department/School/Learning Partnerships Office (LPO), if applicable
 - confirmation that all learning materials will be of appropriate quality and that all technologies and systems used have undergone testing to ensure suitability of the mode of delivery
 - details of the periodic review arrangements for distance learning materials and the programme/unit as a whole
 - quality assurance procedures including information on student support mechanisms, communication methods, assistance available for students with disabilities, student feedback, assessment arrangements, feedback to students on assessed work, student access to tutors, arrangements for External Examiners (including sampling of work), monitoring of student progression.
- 3.6 As set out in [QA20 Collaborative Provision](#), if the programme is delivered in collaboration with a partner institution additional information will also be required. Please refer to QA20 for full details.
- 3.7 Where elements of the programme are delivered or assessed through a local agent, information on arrangements for delivery or assessment should be provided to CPAC. CPAC should be assured of the quality of these arrangements.

4. Evaluation of learning opportunities

- 4.1 At the point of admission, students should confirm that they have understood the requirements of studying on a distance learning programme.
- 4.2 Where a student is using their place of work to achieve some or all of the learning outcomes of the programme, at admission:
- it should be verified that there are no ethical or commercial considerations which might prevent the student from using their place of work to collect data and/or complete their programme
 - students should be encouraged to consider and disclose any limitations in using their workplace to complete their studies
 - it should be confirmed that the student has appropriate learning opportunities in their place of work to complete the programme. If the student's workplace does not provide all the opportunities they require to complete the programme, it will be necessary for appropriate supplementary opportunities to be identified by the student with support from the programme team (which includes both academic and administrative staff). Where work-based learning students undertake a placement outside their normal workplace the placement should be evaluated as set out in [QA6 Placement Learning](#)
 - where this is not already required, the student and employer should be encouraged to sign a learning agreement
 - the work-based learning provider should be identified as the responsible authority for all matters relating to Health and Safety, equalities and diversity and employment legislation.

5. Support for students

- 5.1 Directors of Studies (Postgraduate Taught Students) are responsible for ensuring that students on distance learning programmes have access to appropriate resources, learning opportunities and support in order to meet the learning outcomes of the programme.

- 5.2 Prior to the start of a distance learning programme/unit of study, as set out in [QA44 Programme Handbooks and Programme Specifications](#), all students should be issued with a handbook. The programme handbook should set out students' responsibilities as distance learners and, where applicable, work-based learners and provide them with details of the programme, including assessment requirements, a named contact for academic matters and their entitlements and expectations with regard to learning resources. Specific guidance should be given to CPD students who may take units separately and therefore not have access to all the handbook information relating to each mainstream programme from which units may be drawn.
- 5.3 Prior to the start of a distance learning programme/unit of study, students should receive information regarding:
- the minimum technical specifications for electronic equipment which will be needed to undertake the programme e.g. for PCs, headsets, microphones etc.
 - the schedule for the availability and delivery of study materials
 - the support mechanisms available to them including information on the personal tutoring system, and availability of technical support (accessing virtual learning environments (VLEs) such as Moodle, etc.)
 - the assessment feedback mechanisms, and access to tutors
 - the appropriate communication methods.
- 5.4 Both anticipatory and reasonable adjustments should be used for distance learning and all other forms of off-campus learning in consideration of disabled students. Advice is available from the Disability Service.
- 5.5 Where it is not already prescribed, the appointment of a work-based (or practice based) mentor to provide professional support and advice to work-based learners is strongly encouraged.
- 5.6 It is the responsibility of the programme team to maintain regular contact with work-based learners to ensure that they have adequate learning opportunities to achieve the learning outcomes of the programme.

6. Assessment

- 6.1 Assessment should be undertaken in accordance with University regulations and guidelines. Exams carried out remotely should be overseen by a local agent. Where marking is undertaken at a distance, mechanisms should be in place for the effective moderation of work within the Department/School to ensure comparability of standards with on-campus provision. Deadlines issued for the submission of work by students based abroad, particularly in different time zones or when using shared facilities (e.g. a computer based in a library in a local university or college), should take these circumstances into consideration. Directors of Studies are available for advice, where appropriate, in such cases.
- 6.2 Where employers are involved in the assessment of work-based learning they must be appropriately qualified and receive appropriate support and guidance. Any assessment undertaken by an employer should be moderated by a suitable member of University staff.
- 6.3 As set out in [QA12 External Examining \(Taught Provision\)](#), all External Examiners should be appointed by the relevant Board of Studies. Where possible, the same External Examiner should be appointed with responsibility for programmes offered on a distance learning basis and taught on campus.

7. Premature termination of work-based learning opportunity

- 7.1 If a student's workplace ceases to provide the necessary learning opportunities to meet the learning outcomes of the programme or if the student ceases to be in employment, the programme team will support the student in seeking suitable further work-based learning opportunities.
- 7.2 If a student is unable to find a suitable environment in which to achieve the learning outcomes of the programme, the Director of Studies may have to ask the student to withdraw from the programme.
- 7.3 Where a student apprentice is made redundant more than six months before the planned end date of the apprentice's training programme and no issues with academic performance are identified, the University will endeavour to secure an alternative employer to enable completion of the Apprenticeship. If this is not possible, the Director of Studies may have to ask the student to withdraw from the programme.
- 7.4 If a student apprentice is made redundant within six months of the planned end date of the Apprenticeship, the Apprentice may complete the apprenticeship programme. In these circumstances, the University will act as a 'proxy employer' to provide any required employer competency statement.

8. Use of technology

- 8.1 Where technology is used as a primary delivery mechanism and for the purposes of summative assessments, only institutionally-supported technologies (e.g. VLEs and plagiarism detection software and services such as Moodle, Urkund etc.) should be used and contingency plans in case of technical failure should be in place and clearly communicated. Directors of Studies should ensure that students have a clear point of contact to support their use of technology on the programme. The named contacts should also be notified to the TEL team in the CLT to facilitate their support for this area.

9. Equipping staff to undertake their roles

- 9.1 As set out in [QA9 Professional Development and Recognition for All Staff and Students who Teach and Support Learning](#), staff associated with the development and delivery of all distance learning and work-based learning programmes should receive appropriate support and development particularly in the use of technology. Appropriate arrangements for peer observation and review should be made.

10. Monitoring and review

- 10.1 Appropriate mechanisms, such as student surveys (including unit evaluation), should be employed to ensure effective feedback from students on all aspects of their learning experience. Where possible, representation on University committees should be encouraged either in person or remotely.
- 10.2 Monitoring and review of distance learning provision will be carried out by the relevant Departmental and Faculty/School Learning, Teaching and Quality Committees.

- 10.3 Periodic review of these procedures affecting distance learning provision will be undertaken by the University Learning, Teaching and Quality Committee.
- 10.4. University Learning, Teaching and Quality Committee monitors the direction of provision for work-based learning across the Faculties/School.
